AMOGH P

B.Sc. Hons. - Data Science

Ph: +91-9611550053

Email: amoghp.bsc23@rvu.edu.in

Bengaluru, Karnataka, India - 560072

LinkedIn: https://linkedin.com/in/amogh-prashanth-393b37319

PROFESSIONAL SUMMARY

BSc (Hons) Data Science student specializing in Application Development with hands-on experience in machine learning, full-stack development, and AI-powered systems. Proven track record of building and deploying end-to-end solutions spanning data pipelines, trading platforms, and mobile apps. Interned across AI research, web development, automation, and data analysis roles, consistently delivering impactful, production-ready projects.

KEY EXPERTISE

Python, Machine Learning, Data Analysis, React.js, Firebase, SQL, REST APIs, NLP, Computer Vision, Git

EDUCATION

RV University 2023 - 2027

B.Sc. Hons. - Data Science | CGPA: **8.24** / **10**

sri chaitanya, Bengaluru 2023

12th | PUE Karnataka | Percentage: **76.17** / **100**

KLE Society's School, Nagarabhavi, Bengaluru 2021

10th | CBSE | Percentage: **62.80** / **100**

INTERNSHIPS

Vera | Manufacturing / Core 01 Apr, 2026 - Present

Software Developer

Key Skills: Hosting | ReactJS | Servers | PostgreSQL | Python | Scaling | ERP

Vera ERP is a custom-built, multi-company enterprise resource planning system for Vera Enterprises and its sister companies, Schönes Leben and Hagan Modular. All three are run by one owner from a single platform. It's live at hr.veraenterprises.in and self-hosted on an on-premise Ubuntu 22.04 server.

The system brings the group's disconnected tools, including Tally, Google Drive, and spreadsheets, into one place. The owner can see and manage all three companies' finances, HR, sales, purchase, logistics, and documents from one dashboard, switching between companies or viewing them combined. Each company's data stays separate where it needs to be, like accounts and payroll, and linked where it's shared, like customers and employees. Employees only see the companies they're given access to.

It's built from the ground up for how the group actually operates, not an off-the-shelf install, and serves about 41 employees across the companies

Gojeta | IT / Computers - Software 01 Mar, 2025 - 30 Sep, 2025

Automation Intern

Key Skills: Python, Process Automation, N8N, Problem Solving, Git, GitHub

Developed automation solutions to streamline processes and improve operational efficiency across projects. Demonstrated adaptability in learning new tools and technologies while contributing to team productivity.

RV University 01 Jun, 2025 - 31 Jul, 2025

App developer Intern

Key Skills: FlutterFlow, Firebase, Firestore, Role-Based Access, QR Integration, Real-Time Dashboard, Analytics

Designed and developed a role-based Club Management App using FlutterFlow and Firebase, enabling seamless access for students, club heads, reps, and deans. Implemented features for event discovery, registration with QR codes, club joining, external event requests, and real-time approvals via a structured dashboard. Integrated Firestore authentication, secure access rules, and analytics for attendance tracking, making the system scalable for collegewide deployment.

RV University 01 Jun, 2024 - 31 Jul, 2024

Research Intern

Key Skills: YOLOv5, Deep Learning, Model Training, Image Annotation, Hyperparameter Tuning, mAP Evaluation, Python

Worked on a deep learning project focused on wheat head detection using the YOLOv5 object detection model, Developed and trained custom YOLOv5 pipelines to detect and analyze wheat head growth stages from agricultural images, Preprocessed and annotated large-scale image datasets, fine-tuned model hyperparameters, and improved detection accuracy, Evaluated model performance using precision, recall, and mean average precision (mAP) metrics for deployment readiness, Collaborated with researchers to align model outputs with agricultural growth assessment criteria.

ChaturManas Consultants 16 Jan, 2024 - 29 Feb, 2024
Web Developer

Key Skills: HTML, CSS, JavaScript, UI/UX Design, Web Development, Data Analysis, Onboarding Tools

Designed and developed the company's official website, ensuring responsive UI/UX, Conducted data analysis on training program outcomes to assess learner progress, identify gaps, and align content with organizational goals, Collaborated with the content and training teams to enhance digital visibility and streamline the onboarding experience through webbased tools.

Internshub 15 Oct, 2023 - 15 Dec, 2023
Artificial Intelligence Intern

Key Skills: Python, Machine Learning, Artificial Intelligence, Data Analysis

Completed an internship specializing in Artificial Intelligence, applying AI concepts to real-world problem-solving scenarios. Gained hands-on exposure to machine learning workflows and AI-driven solutions while demonstrating strong technical aptitude and proactive learning attitude throughout the program.

MasterCom 01 Sep, 2023 - 31 Oct, 2023
Data Analysis Intern

Key Skills: Python, Data Analysis, Exploratory Data Analysis (EDA), Product Development Lifecycle

Completed a part-time internship focused on data analysis programming, gaining exposure to the product development lifecycle and Python-based data analysis workflows.

PROJECTS

vera ERP 01 Apr, 2026 - 01 Jan, 2027
Project Link: https://veraenterprises.in

Vera ERP is a custom-built, multi-company enterprise resource planning system for Vera Enterprises and its sister companies, Schönes Leben and Hagan Modular. All three are run by one owner from a single platform. It's live at hr.veraenterprises.in and self-hosted on an on-premise Ubuntu 22.04 server.

The system brings the group's disconnected tools, including Tally, Google Drive, and spreadsheets, into one place. The owner can see and manage all three companies' finances, HR, sales, purchase, logistics, and documents from one dashboard, switching between companies or viewing them combined. Each company's data stays separate where it needs to be, like accounts and payroll, and linked where it's shared, like customers and employees. Employees only see the companies they're given access to.

It's built from the ground up for how the group actually operates, not an off-the-shelf install, and serves about 41 employees across the companies.

truecommit 01 Aug, 2026 - 15 Aug, 2026
Project Link: https://github.com/KernelLex/track-03

A bounded autonomous agent for Indian B2B and subscription revenue recovery. Razorpay AI Buildathon 2026, Track 03.
It reads what a debtor actually said, works out which kind of failure it is, and takes the action that fits — while a separate deterministic gate decides whether it's allowed to. The part worth judging isn't that it acts. It's what it refuses to do, and that the refusals are checkable by someone who doesn't trust me

hazenlights 25 Feb, 2026 - 26 Mar, 2026
Project Link: https://hazenlights.com

Developed Hazen Lights, a refined e-commerce and brand platform built to showcase high-end lighting solutions. Focused on clean aesthetic design, lightning-fast performance, and a smooth, conversion-optimized shopping experience across all devices with custom 3d animation

secant 01 Jan, 2026 - 01 Feb, 2026

Key Skills: WebGL GSAP Next.js Tailwind CSS

Project Link: https://secant.in/

Engineered Secant.in, a high-performance 3D interactive web platform featuring real-time WebGL rendering and custom motion design. Integrated dynamic camera controls, smooth micro-interactions, and heavily optimized 3D assets to create an immersive, fluid user journey across both desktop and mobile viewports

LeadScope – B2B Prospect Research Dashboard

Key Skills: Python, Streamlit, BeautifulSoup, Pandas, SQLite, REST APIs, Data Scraping, DuckDuckGo Search

Project Link: https://github.com/KernelLex/scrapperv2

Built an ethical B2B lead generation dashboard that searches public data sources to discover and score prospects by sector and city. Implemented a multi-backend search pipeline, digital presence scoring, lead tagging, and CSV export with a glassmorphism Streamlit UI backed by SQLite.

CropRadar – AI-Powered Crop Disease Intelligence Bot

Key Skills: Python, FastAPI, Telegram Bot API, Google Gemini Vision, Streamlit, Folium, SQLite, REST APIs, Open-Meteo API

Project Link: https://github.com/KernelLex/CropRadar-01

Built a messaging-first crop intelligence system where farmers send crop photos via Telegram to receive AI-powered disease diagnosis, treatment guidance, and bilingual outbreak alerts. Integrated live weather data and NDVI-based vegetation signals into a predictive risk scoring engine that warns farmers before visible symptoms appear. Geo-tagged reports feed a regional outbreak map triggering proactive community alerts when disease clusters are detected.

Trading Strategy Engine – AI-Driven Financial Research Platform

Key Skills: Python, FastAPI, React.js, TypeScript, DuckDB, OpenAI API, FinBERT, SHAP, Pandas, Tailwind CSS

Project Link: https://github.com/KernelLex/trading-engine

Built an end-to-end AI-powered quantitative trading platform that ingests multi-source market data from Yahoo Finance, NewsAPI, and FRED, runs FinBERT sentiment analysis, and generates trading hypotheses via LLM agents. Automated backtesting simulates portfolio performance with Sharpe ratio and drawdown metrics, while SHAP-based explainability attributes signal importance. Surfaced through a live React dashboard with 7 analytical panels.
